

270net to Redesign American Law Enforcement Association Website

FREDERICK, MD (January 8, 2008) – After considering a number of options, the American Law Enforcement Association (ALEA) selected [270net Technologies, Inc.](#), a Veteran-Owned Small Business (VOSB) providing IT services to public and private sector clients, for a significant redesign and upgrade of its 700-page website and work flow processes.

In addition to developing a new graphical design for the website, 270net will convert a number of static sections of the ALEA website to dynamic, database-driven modules that can be easily updated by ALEA staff. As an example, 270net's Photo Gallery module will be used to dynamically display over 3,800 aircraft photos. (www.alea.org)
