

270net to Develop Web Application for United States Coast Guard

FREDERICK, MD (May 1, 2008) – [270net Technologies, Inc.](#), a Veteran-Owned Small Business (VOSB) providing IT services to public and private sector clients, was selected by Keres Consulting, Inc. to develop a web application for the United States Coast Guard (USCG) as part of Keres' overall project for providing real property asset management services to the USCG.

Federal agencies must meet the requirements of Executive Order 13327 (*Federal Real Property Management*) and the Federal Real Property Council (FRPC). One of the requirements is the implementation of a consolidated data inventory of all real property assets, including owned and leased assets.

The USCG assigned Keres, which has assisted USCG and other federal agencies with their asset management programs for years, the task of developing a solution for capturing and managing its leased real property assets. Keres turned to 270net, its IT strategic partner of over six years, to perform the programming and development work for the project. 270net is working with Keres and USCG to develop a web-based application that meets the Executive Order and FRPC requirements and will be used by USCG Real Property Officers to manage leased property assets while a long-term enterprise-level system is implemented. 270net will also assist with real property data migration, validation, and analysis.

About 270net Technologies
